GENERAL NOTE

The general format of the Statistical Appendix has been rearranged to conform to the organization of the Bureau of Land Management, which is divided into management areas as depicted in the map on the back cover. The States in each area have, for the most part, been arranged alphabetically.

Since public-land transactions are reported at many different stages of processing, statistics released by the various land-management agencies or by the same agency in different years must be checked carefully for comparability. The following paragraphs, detailing the stages at which the data in the Appendix were reported, has therefore been prepared to clarify seeming discrepancies in published figures and to facilitate the use of these tables in conjunction with reports from various agencies.

Areas officially surveyed are reported as of the date of acceptance of the plat of survey by the Director of the Bureau of Land Management, but surveys in the field are reported as of the date of completion in the field.

Withdrawals, restorations, and classifications are reported as of the date of the act of Congress, proclamation, or order (Executive, Departmental, or Public Land Order) which determines the status of the lands involved.

Patents and certifications are reported as of the date of issuance, as are deeds, permits, leases, licenses, and timber-sale contracts.

Entries, filings, and original selections are reported at the end of the accounting process, that is, when the required moneys are covered into the Treasury.

Exchanges and grants are reported as of the date of the patent or certification conveying the exchanged lands to non-Federal owners.

Receipts are reported as of the date they are covered into the Treasury.

Lands found suitable for classification are reported as of the date of action, as are "O. and C." timber sales and collections. "O. and C." income, however, is reported as of the date the money is covered into the Treasury.

c/ Based on allowable cut of year concerned. Since figures for allowable cut include the controverted lands, sales data for this ratio include the cut from the controverted lands in years prior to 1955 and 1956. The 1955 and 1956 figures are based on the "O. and C." lands, exclusive of the "O. and C." controverted lands placed under Forest Service administration by Public Law 426. The sale volumes used in this calculation include salvage sales not ordinarily chargeable against the allowable cut.
